Maneuvering through an airport is hard enough without carrying baby paraphernalia. To help lighten the load, there's a new air-travel device called **Gogo-Kidz** Travelmate. Attach it to a child's car seat and wheel around the airport stroller-style. With 5-inch wheels for a smooth ride, the **Gogo-Kidz** is safe and comfortable for small children. On the plane, it can be detached and stored flat in an overhead compartment. The **Gogo-Kidz** retails for \$89. Contact: [www.gogobabyz.com](http://www.gogobabyz.com).
